Resources that you can provide

Built upon over 35 years of experience, Shigeki Kuzuoka provides extensive consulting and affiliate services related to all aspects of the space technology industry. My services include strategy, policy, and technology planning and analysis, as well as market research, global market development, and M&A support. I also serve as an affiliate – representing leading-edge global companies in Japan.

Resources I can provide are as follows.

- Business development support
- Business planning support
- Industrialization, and commercialization support
- Business matching support
- Training support
- User requirement analysis support
- Market analysis support
- Technical support

These supports can be provided without any charge depending on the case specific features. Please contact me to start the discussion.
