Organization/Company: Hyperion Technologies

Address: Motorenweg 5H, 2623CR, Delft, The Netherlands

Email: s.engelen@hyperiontechnologies.nl

Website (URL): www.hyperiontechnologies.nl

Resources that you can provide

Hyperion can provide mentoring, consultation and components for their missions. We focus on AOCS components, such as star trackers, reaction wheels and magnetorquers, yet also have payloads, payload processing platforms and other subsystems available. Most of our components are used in missions which involve small satellites, yet all of our hardware is fully qualified to higher standards. We can provide discounts, decided on a case-by-case basis.
