

**Mission Idea Contest
Regional Seminar in Venezuela
November 18, 2010
Place: CELARG Casa Rómulo Gallegos, Altamira, Caracas**

The MIC seminar in Venezuela took place in a very interesting way. The attendants received with enthusiasm the mission idea contest. More than questions, the attendant gave comments about their interest to generate MIC proposals. One of the most interesting ideas explained for a group of assistants was based on Nano Satellites.

The MIC Venezuela seminar was attended by academicians, researchers and undergraduate students. Among them : Universidad Simón Bolívar, Universidad de la Fuerza Armada, ABAE Bolivarian Agency of Space Matters.

The result of the seminar was successful in the sense that few proposals were commented which will evolve into National proposals.

Best Regards,

Andrés Arenas, MBA, Ph.D.
